The journal NeoBiota is a continuation of the former NEOBIOTA publication series.
For volumes 1–8 see http://www.oekosys.tu-berlin.de/menue/neobiota/

Contents

More than we bargained for: Zebra mussels transported amongst European native freshwater snails
James W. E. Dickey, Reid S. Brennan, Sharra Sue-Whi Chung, Jonathan M. Jocobbe, Gregor T. Steffen, Elizabeta Briski

The Alien to Cyprus Entomofauna (ACE) database: a review of the current status of alien insects (Arthropoda, Insecta) including an updated species checklist, discussion on impacts and recommendations for informing management
Jakovos Demetriou, Canella Radea, Jodey M. Peyton, Quentin Groom, Alain Roques, Wolfgang Rabitsch, Nino Seraphides, Margarita Arianoutsou, Helen E. Roy, Angeliki F. Martinou

Escape from the garden: spreading, effects and traits of a new risky invasive ornamental plant (Gaillardia aristata Pursh)
Gabriella Sule, Zsombor Molnar, Csaba Molnar, Aniko Kovacs-Hostiany, Annamaria Fenesi, Norbert Bauer, Viktor Szegeti

Invasive terrestrial invertebrate detection in water and soil using a targeted eDNA approach
Cecilia Villacorta-Rath, Lari Lach, Natalia Andreu-Rodriguez, Damien Burrows, Diana Eilenon, Alejandro Trujillo-Gonzalez

Intraguild predation as a potential explanation for the population decline of the threatened native fish, the European mudminnow (Umbra krameri Walbaum, 1792) by the invasive Amur sleeper (Perccottus glenii Dybowski, 1877)
Dina Somaggi, Tibor Erki, Attila Musato, Ivan Cizgeli, Julia Szoles, Richard Tib, Nurfatin Zakriple, Lazlo Antal, Krisztian Nyeste

Aerial culling invasive alien deer with shotguns improves efficiency and welfare outcomes
Corey J. A. Bradshaw, Andrew Doube, Annette Scanlon, Brad Page, Myall Terran, Kate Fielder, Lindell Andrews, Steve Bourne, Mike Serrens, Penny Schule, Tom Klooden, Deb Durrea, Rob Matthews, Chris Findlay, Warren White, Craig Leehane, James Doube, Ted Bowley

Potential impacts of invasive crayfish on native benthic fish: shelter use and agonistic behaviour
Esmat Mohamed, Rabina Amen, Huda M. Abdelrahman, Carola Winkelmann

Searching for the competitive ability of the alien seagrass Halophila stipulacea with the autochthonous species Cymodocea nodosa
Anna Maria Martino, Paolo Balistreri, Francesco Paolo Mascio, Fabio Basseda, Maurizio Pisa

Temporal trends in the accumulation of alien vascular plant species through intentional and unintentional introductions in Japan
Chiaka Egawa, Anaka Kojima
NeoBiota is a peer-reviewed open-access, rapid online journal on the underlying mechanisms and associated consequences of all types of alien species and biological invasions. NeoBiota publishes papers across all disciplines interested in biological invasions, specifically on the ecology, evolution and biogeography of non-indigenous aquatic and terrestrial animals, plants, fungi and microorganisms, on mechanisms that drive the introduction, establishment and spread of these species, and on the management of invasions in any part of the world. NeoBiota also strongly encourages papers on ethical, social, legal and policy issues related to biological invasions.

NeoBiota will consider for publishing works on the following topics:

- Original research articles
- Reviews as longer articles, offering a comprehensive overview, historical analysis or/and future perspectives of a topic
- Monographs and collection of papers with no limit in size, published as 'special issues'
- Short communications
- Letters and Discussion papers
- Book reviews
- Data papers

ISBN numbers will be assigned to large monographic papers, monographs, collections of papers, Festschrift volumes, atlases, checklists, or prospectus.

All content is Open Access distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

AUTHOR GUIDELINES

Authors are kindly requested to submit their manuscript only through the online submission module at http://neobiota.pensoft.net/. In case of difficulties with the submission procedure, please contact neobiota@pensoft.net. Full text of author guidelines is available at: http://neobiota.pensoft.net/about#AuthorGuidelines

EXCERPTS FROM THE GUIDELINES

BODY TEXT: All papers must be in English, checked by a native English-speaking colleague (if author(s) are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) LINKS: Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the http:// portion of the address.

CITATIONS WITHIN THE TEXT: Before submitting the manuscript, check each citation in the text against the References to ensure that they match exactly. Delete citations from the list if they are not actually cited in the text of the article. Citations in the text should be formatted as follows: (Smith 1990) or (Smith et al. 1998; Brock and Gunderson 2001, Feit 2006).

REFERENCES: It is crucial to properly format the references, because all references will be linked electronically as much as possible to the papers they cite. For all references, list all authors. You can include a DOI number for the full-text article as an alternative to or in addition to traditional volume and page numbers. Please use the following style for the reference list:

Accepted Papers: Same as above, but “In press” appears instead the page numbers.

CITATIONS OF PUBLIC RESOURCE DATABASES: It is highly recommend that all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate). Accession numbers should be provided in parentheses after the entry on first use. Examples of such databases include, but are not limited to:

- ZooBank (www.zoobank.org),
- MOpthbank (www.morphbank.net),
- Genbank (www.ncbi.nlm.nih.gov/Genbank),
- BarCode (www.barcodinglife.org)

Providing accession numbers allows linking to and from established databases and integrates your article with a broader collection of scientific information. Please list all accession numbers directly after the References.

DATA PUBLISHING: The journal offers various models of data publishing in a cooperation with the GBIF (www.gbif.org), Dryad (www.datadryad.org), Pangaea (www.pangaea.de) and other data repositories.

OPEN ACCESS FEES: Publication fees in open access journals ensure a barrier-free distribution of your paper to as many readers as possible and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee of EURO 20 per page for papers of less than 100 printed pages. Publication fees for larger papers will be discounted and can be negotiated with the Managing Editor. Open Access Publication Fees are usually covered by institutional funds and grants. Discounts waivers can be requested by private and retired zoologists, scientists from low- and middle-income countries, postgraduate students, especially in case of exceptionally good manuscripts. Discounts will be offered also to scientists who actively participate in the reviewing and editing process.

Note: Open access fee will be waived for all submissions published in the first four issues of NeoBiota and will be reduced with 25% until the journal will be covered by the ISI Web of Science. All papers published in the first issues will be later ISI covered and will have an impact factor when the journal receive it.

PRINTED VERSION: Offprints and printed issues of the journal can be purchased at a low cost (see journal’s website). For standing orders/subscriptions please contact the Managing Editor.
