

The journal NeoBiota is a continuation of the former NEOBIOTA publication series. For volumes 1–8 see <http://www.oekosys.tu-berlin.de/menue/neobiota/>

Contents

1

Historical evidence for context-dependent assessment of *Erigeron canadensis* invasions in an 18th-century European landscape

Ingo Kowarik

17

A multi-taxa assessment of aquatic non-indigenous species introduced into Iberian freshwater and transitional waters

Jose M. Zamora-Marín, Ana Ruiz-Navarro, Francisco J. Oficialdegui, Pedro M. Anastácio, Rafael Miranda, Pablo García-Murillo, Fernando Cobo, Filipe Ribeiro, Belinda Gallardo, Emili García-Berthou, Dani Boix, Leopoldo Medina, Felipe Morcillo, Javier Oscoz, Antonio Guillén, Antonio A. Herrero-Reyes, Francisca C. Aguiar, David Almeida, Andrés Arias, César Ayres, Filipe Banha, Sandra Barca, Idoia Biurrun, M. Pilar Cabezas, Sara Calero, Juan A. Campos, Laura Capdevila-Argüelles, César Capinha, André Canapeto, Frederic Casals, Paula Chainho, Santos Cirujano, Miguel Clavero, Jose A. Cuesta, Vicente Deltoro, João Encarnação, Carlos Fernández-Delgado, Javier Franco, Antonio J. García-Meseguer, Simone Guareschi, Adrián Guerrero-Gómez, Virgilio Hermoso, Celia López-Cañizares, Joaquín López-Soriano, Annie Machordom, Joana Martelo, Andrés Mellado-Díaz, Juan C. Moreno, Rosa Olivo del Amo, J. Carlos Otero, Anabel Perdices, Quim Pou-Rovira, Sergio Quiñonero-Salgado, Argantonio Rodríguez-Merino, Macarena Ros, Enrique Sánchez-Gullón, Marta I. Sánchez, David Sánchez-Fernández, Jorge R. Sánchez-González, Oscar Soriano, M. Alexandra Teodósio, Mar Torralva, Rufino Vieira-Lanero, Antonio Zamora-López, Francisco J. Oliva-Paterna

45

Clarification and guidance on the use of the Socio-Economic Impact Classification for Alien Taxa (SEICAT) framework

Anna F. Probert, Giovanni Vimercati, Sabrina Kumschick, Lara Volery, Sven Bacher

71

Headwater refuges: Flow protects *Austropotamobius* crayfish from *Faxonius limosus* invasion

Alina Salmari, Kristian Miok, Mihaela C. Ion, Claudia Zaharia, Anne Schrimpf, Lucian Pârvulescu

95

Tracing the origins and tracking the movements of invasive rubber vines (*Cryptostegia* spp., Apocynaceae)

Marion K. Seier, Alessandro Rapini, Kate M. Pollard, Robert W. Barreto, Harry C. Evans

Focus and Scope

NeoBiota is a peer-reviewed, open-access, rapid online journal on the underlying mechanisms and associated consequences of all types of alien species and biological invasions. **NeoBiota** publishes papers across all disciplines interested in biological invasions, specifically on the ecology, evolution and biogeography of non-indigenous aquatic and terrestrial animals, plants, fungi and micro-organisms, on mechanisms that drive the introduction, establishment and spread of these species, on ecological, evolutionary, economic and other consequences of biological invasions, and on the management of invasions in any part of the world. **NeoBiota** also strongly encourages papers on ethical, social, legal and policy issues related to biological invasions.

NeoBiota will consider for publishing works on the following topics:

- Original research articles
- Reviews as longer articles, offering a comprehensive overview, historical analysis or/and future perspectives of a topic
- Monographs and collection of papers with no limit in size, published as 'special issues'
- Short communications
- Letters and Discussion papers
- Book reviews
- Data papers

ISBN numbers will be assigned to large monographic papers, monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

Contents

135

Genetic and morphological insights into the *Carpobrotus* hybrid complex around the world
Ana Novoa, Heidi Hirsch, María L. Castillo, Susan Canavan, Luís González, David M. Richardson, Petr Pyšek, Jonatan Rodríguez, Lurdes Borges Silva, Giuseppe Brundu, Carla M. D'Antonio, Jorge L. Gutiérrez, Megan Mathese, Sam Levin, Luís Silva, Johannes J. Le Roux

161

The devil is in the details: exploring how functionally distinct round goby is among native fish in the Baltic Sea
Antoni Vivó-Pons, Isa Wallin-Kihlberg, Jens Olsson, Peter Ljungberg, Jane Behrens, Martin Lindegren

187

Allelopathy and arbuscular mycorrhizal fungi interactions shape plant invasion outcomes
Xiao Guo, Xin-Yue Liu, Si-Yu Jiang, Shao-Xia Guo, Jing-Feng Wang, Yi Hu, Shi-Mei Li, Hai-Mei Li, Tong Wang, Ying-Kun Sun, Ming-Yan Li

209

Germany's first Action plan on the pathways of invasive alien species to prevent their unintentional introduction and spread
Katharina Mayer, Tina Heger, Ingolf Kühn, Stefan Nehring, Mirijam Gaertner

229

***Cortaderia selloana*, an example of aggressive invaders that affect human health, yet to be included in binding international invasive catalogues**
Diego Liendo, Juan Antonio Campos, Alberto Gandarillas

239

Biochar application can mitigate the negative impacts of drought in invaded experimental grasslands as shown by a functional traits approach
Hamada E. Ali, Solveig Franziska Bucher, Markus Bernhardt-Römermann, Christine Römermann
