

The journal NeoBiota is a continuation of the former NEOBIOTA publication series.
For volumes 1–8 see <http://www.oekosys.tu-berlin.de/menue/neobiota/>

Contents

- | | |
|-----|---|
| 1 | Extent, impacts and drivers of oystershell scale invasions in aspen ecosystems
Connor D. Crouch, Amanda M. Grady, Nicholas P. Wilhelmi, Richard W. Hofstetter, Margaret M. Moore, Kristen M. Waring |
| 35 | Low impact of <i>Carpobrotus edulis</i> on soil microbiome after manual removal from a climate change field experiment
Carola Gómez-Rodríguez, Rubén Retuerto, Josefina G. Campoy, Susana Rodríguez-Echeverría |
| 59 | Explosive spread of sand dropseed (<i>Sporobolus cryptandrus</i>), a C₄ perennial bunchgrass, threatens unique grasslands in Hungary (Central Europe)
György Kröl-Dulay, Attila Rigo, Eszter Tanács, Katalin Szitár, Gábor Ónodi, Eszter Aradi, Zsolt Bakró-Nagy, Marianna Biró, Zoltán Botta-Dukát, Tibor Kalapos, András Kelemen, Annamária Laborczi, László Pásztor, Quinter Akinyi Rabuogi, Andrea Mojzes |
| 77 | Testing a trapping protocol for generic surveillance of wood-boring beetles in heterogeneous landscapes
Giacomo Santoiemma, Andrea Battisti, Claudine Courtin, Gianfranco Curletti, Massimo Faccoli, Nina Feddern, Joseph A. Francese, Emily K. L. Franzen, Filippo Giannone, Martin M. Gossner, Chantelle Kostanowicz, Matteo Marchioro, Davide Nardi, Ann M. Ray, Alain Roques, Jon Sweeney, Kate Van Rooyen, Vincent Webster, Davide Rassati |
| 97 | The Japanese climbing fern (<i>Lygodium japonicum</i>) invasion in the U.S.; insights from chloroplast genome sequencing
Morgan L. Markley, Ethan Altergott, James B. Beck |
| 109 | Predicting the expansion of invasive species: how much data do we need?
Joana Santana, Neftalí Sillero, Joana Ribeiro, César Capinha, Ricardo Jorge Lopes, Luís Reino |
| 133 | Assessing ongoing risks and managing detections of non-native invertebrates in the Antarctic Region
Isabelle R. Onley, Melissa J. Houghton, Kirsten Leggett, Phill Cassey, Zachary T. Carter, Justine Shaw |
| 149 | Design of an eDNA sampling method for detection of an endophagous forest pest
Kathleen E. Kyle, Michael C. Allen, Nathan W. Siegert, Jason Grabosky, Julie L. Lockwood |
| 165 | No evidence for pronounced mate-finding Allee effects in the emerald ash borer (<i>Agrilus planipennis</i> Fairmaire)
Alexandre P. Caouette, Claire E. Rutledge, Stephen B. Heard, Deepa S. Pureswaran |

FOCUS AND SCOPE

NeoBiota is a peer-reviewed, open-access, rapid online journal on the underlying mechanisms and associated consequences of all types of alien species and biological invasions. **NeoBiota** publishes papers across all disciplines interested in biological invasions, specifically on the ecology, evolution and biogeography of non-indigenous aquatic and terrestrial animals, plants, fungi and micro-organisms, on mechanisms that drive the introduction, establishment and spread of these species, on ecological, evolutionary, economic and other consequences of biological invasions, and on the management of invasions in any part of the world. **NeoBiota** also strongly encourages papers on ethical, social, legal and policy issues related to biological invasions.

NeoBiota will consider for publishing works on the following topics:

- Original research articles
- Reviews as longer articles, offering a comprehensive overview, historical analysis or/and future perspectives of a topic
- Monographs and collection of papers with no limit in size, published as 'special issues'
- Short communications
- Letters and Discussion papers
- Book reviews
- Data papers

ISBN numbers will be assigned to large monographic papers, monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

Contents

- 181** Niche partitioning of invasive Amur sleeper (*Percottus glenii*) amongst native fish communities in three different freshwater ecosystems
Fabio Ercoli, Mikko Kiljunen, Paul Teesalu, Arvo Tuvikene, Meelis Tambets, Einar Kärgenberg, Tiina Nõges

- 199** Interactions between invasive pests and pathogens in a native chestnut forest
María Flora Romay-Río, Fernando Castedo-Dorado, Matthew P. Ayres, Alba Noelia Prado, María J. Lombardero

- 221** Thematic mapping of biosecurity highlights divergent conceptual foundations in human, animal, plant and ecosystem health
Philip E. Hulme

- 241** Biological invasions threaten crops: Alien Himalayan balsam lures and co-opts floral visitors away from cultivated cherry tomatoes
Kamil Najberek, Katarzyna Patejuk, Izabela Czeluśniak, Wojciech Solarz, Marek Hojniak, Agata Kaczmarek-Pieńczecka, Anna Jakubska-Busse

- 267** Comparing the ecological consequences of globally invasive fishes versus their F1 hybrids in recreational fisheries
Ali Serhan Tarkan, Irmak Kurtul, J. Robert Britton

- 279** Reliable molecular detection of small hive beetles
Orlando Yañez, Marga van Gent-Pelzer, Anna Granato, Marc Oliver Schäfer, Peter Neumann

- 291** Rising temperatures may increase fungal epizootics in northern populations of the invasive spongy moth in North America
Clare A. Rodenberg, Ann E. Hajek, Hannah Nadel, Artur Stefanski, Peter B. Reich, Kyle J. Haynes

- 309** Performance in the recruitment life stage and its potential contribution to invasive success in the polyploid invader *Centaurea stoebe*
Kevin Kožić, Matthias Hartmann, Ragan M. Callaway, Isabell Hensen, Dávid U. Nagy, Patrik Mráz, Mohammad M. Al-Ghraibeh, Svetlana Bancheva, Alecu Diaconu, Jiří Danihelka, David J. Ensing, Rita Filep, Zigmantas Gudžinskas, Avni Hajdari, Roxana Nicoară, Susanne Lachmuth, Chandra E. Moffat, Andriy Novikov, Dragica Purger, Mandy L. Slate, Agnieszka Synowiec, Ghizela D. Vonica, Annika M. Zuleger, Christoph Rosche
